

Neural Network Layer and Operation Support Guide

Revision: 02 (ref. v1.17-20200623)

Release Date: 2020-07-18

Amlogic provides this Vivante engineering document for distribution only to its licensee under NDA.

Vivante [AppNote.VIP.Neural.Network.Layer.and.Operation.Support-v1.17-20200623.pdf]

This Vivante engineering document contains copyright confidential material disclosed with permission of Vivante Corporation. Vivante has authorized re-distribution of this material restricted to those NDA partners and licensees of *Amlogic* who are engineering *Amlogic products* which includes the discussed Vivante IP.

Application Note:

Document Version 1.17 23 June 2020

COPYRIGHT INFORMATION

This document contains proprietary information of Vivante Corporation. Vivante Corporation reserves the right to make changes to any products herein at any time without notice. Vivante Corporation does not assume any responsibility or liability arising out of the application or use of any product described herein, except as expressly agreed to in writing by Vivante Corporation; nor does the purchase or use of a product from Vivante Corporation convey a license under any patent rights, copyrights, trademark rights, or any other of the intellectual property rights of Vivante Corporation or third parties.

DISCLOSURE/RE-DISTRIBUTION LIMITATIONS

This document contains proprietary information of Vivante Corporation. The information contained in this Vivante Confidential document may be directly re-distributed or may be adapted for re-distribution by Vivante customer SoC vendors who have licensed the related core IP, with the understanding that re-distribution is limited to those customers of the SoC vendor who have active and valid NDA or licenses applicable for the SoC which contains the related Vivante core IP. Otherwise, the information contained herein is not to be used by or disclosed to the third parties without the express written permission of an officer of Vivante Corporation.

(Vivante Distribution LEVEL B: CONFIDENTIAL DISTRIBUTION RESTRICTED)

Upon request Vivante provides this document in Word format for adaptive inclusion in documentation intended for your customers. Vivante requests a pre-release copy of the adaptation for review and approval. In the adapted document please include a reference to the copyright owner, for example: "This chapter contains copyright confidential and proprietary material disclosed with permission of Vivante Corporation. Vivante has authorized re-distribution of this material restricted to those NDA partners and licensees of [the SoC vendor] who are engineering [SoC vendor's product] which includes the discussed Vivante IP."

TRADEMARK ACKNOWLEDGMENT

1 Overview

This document provides a summary of the neural network layers and operation supported by the VIP ACUITY Tool Kit and compatible Driver Software stack.

2 Deep Learning Frameworks - ACUITY Operation Mapping

The following neural-network operations and corresponding supported API functions are listed in the following table:

- <u>Caffe</u>: some non-standard Caffe layers may be supported according to release schedule.
- <u>TensorFlow API r1.13</u>: all activation ops apply component-wise, and produce a tensor of the same shape as the input tensor.
- TensorFlow (TF) Lite Ops (Schema v3)
- Onnx (v1.6)
- Darknet: generated from https://pjreddie.com/darknet/
- Keras: generated by Tensorflow 1.13.x.

2.1 Caffe to ACUITY Mapping

Table 1. Caffe-ACUITY Operations Mapping

(Caffe in gray rows; below is ACUITY equivalent in white row)

absval	ахру	batchnorm/bn	convolution	concat
abs	a_times_b_plus_c	batchnormalize	convolution	concat

4 VIP Neural Network Layer and Operation Support Overview

The neural-network layers and operations are supported by the following VIP ACUITY Tool Kit and compatible Driver Software stack, where the ACUITY Tool Kit can convert networks containing these layers and generate corresponding Driver Software API calls for inferencing on the VIP hardware.

- ACUITY Tool Kit 5.14.0 or later.
- OVXLIB 1.1.24 or later, High level wrapper library with additional NN APIs for OpenVX, vx_kernel() provides for customized kernel implementations.
- Vivante GALVIP Unified Driver 6.4.x version 6.4.3 or later
- Support level as of software releases versions contemporary with this App Note.

Compatible VIP hardware is required where the computing engine provides NN and PPU support. Some operations are hardware independent in the Vivante implementation.

- NN
- Neural-Network Engine
- PPU
- Parallel Processing Unit
- TP
- Tensor Processor
- CPU
- Central Processor Unit

This support list is subject to change with routine software updates. Unless specified otherwise, all listed layers are supported for V7x, v80x and V81x VIP and NPU hardware.

Document Revision History

Version	Date	Compatible HW rev	Notes	
1.17	2020-06-23	Vivante SW releases from June 2020	Update Section 2 tables. Table 7: Add operations: fullconnect_op, mish, hard_sigmoid. Table 8: update swish, h_swish support engine, add hard_sigmoid, mish.	
1.16	2020-06-12	Vivante SW releases from May 2020	Update Section 4 OVXLIB bullet text.	
1.15	2020-05-26	Vivante SW releases from May 2020	Update Section 2. Table 7, 8: Add operations: moments, batchnorm_single	
1.14	2020-04-28	Vivante SW releases from April 2020	Add Section 2. Add Section 3. Table 8: Add and enrich ACUITY ops / OVXLIB columns	
1.13	2020-03-23	Vivante SW releases from Mar 2020	Tables 1 and 2: Add operations: hard_swish, depthwise_conv1d, group_conv1d and log_softmax.	
1.12	2020-03-16	Vivante SW releases from Dec 2019	Legal Notices: distribution level changed from C to B. Update NN support levels for relu, prelu and leaky_relu.	
1.11	2020-02-25	Vivante SW release of Dec 2019	Legal Notices: distribution level changed from D to C.	
1.10	2019-12-24	Vivante SW release of Dec 2019	Section 1: Update compatible sw versions. Table 1 and Table 2: Add Ops: swish, log, maximum. Table 2: add ONNX column.	
1.09	2019-12-03	Vivante SW release of Nov 2019	Section 1: Update compatible sw versions. Table 1: Update Operation Support Engine: gather, add_n, matrix_mul Table 2: Update gather openvx_api	
1.08	2019-11-25	Vivante SW release of Nov 2019	Table 1: Update Operation Support Engine. Changed: add, equal, prelu, floor_div, logical_and, where, stack, unstack, argmin. Removed CPU column	
1.07	2019-10-28	Vivante SW release of late Oct 2019	Section 1: Update compatible sw versions. Sections 2 and 3, Tables 1 and 2: Added ops: gru_cell, gru, reverse_squeeze and argmin. Miscellaneous refinements, including alphabetic sorting	
1.06	2019-07-26	Vivante SW as of v6.4.0.RC2 release.	Table1 and Table 2: Added ops: equal, minimum, where, real_div, add_n, exp, square, negative, abs, clip_by_value, unstack, gather	
1.05	2019-05-22	Vivante SW as of v6.3.3.4 release.	Section 2: Added version numbers Section 3: revised Tensorflow API link, added Caffe layer link Table 1: added CPU column for each layer Table1 and Table 2: Added ops: logical_and, resize_nearestneighbor, expand_dims, reduce_sum, stack	
1.04	2019-01-08	Vivante SW	Changed from Memo to AppNote.	

Vivante App Note: VIP Neural Network Layer and Operation Support

		as of v6.3.1	Table 1: added column for TP support. Updated names and support.
		release.	Added Table 2. Neural Network API Reference Names. Changed page orientation to landscape for Table 2.
1.03	2018-10-04	Vivante SW	Table 1 changes:
2.00		as of v6.3.1	- Changed category Activations to Activation.
		release.	- Element Wise category: changed floor from PPU to NN, removed
			max, added mean, removed scale.
			- Normalization category: changed batch_normalize from NO-OP to
			PPU, removed I2_normalize_scale.
			- RNN category: change lstm from PPU to NN.
			- Changed category Tensor Reshape to Reshape.
			- Reshape category: changed concat, flatten, reshape, split and
			squeeze from NO-OP to NN, changed depth_to_space and
			space_to_depth from PPU to NN, moved reverse from Other
			category and changed from PPU to NN, added shuffle_channel.
			 Others category: removed dropout, embedded_lookup,
			hashtable_lookup, lsh_projection and svdf; change roi_pool from
			NN to PPU.
			Removed Notes (1)~(3) at the bottom of Table 1.
1.02	2018-09-20	Vivante SW	Updated Table 1.
		as of v6.3.1	Minor refinements.
		release.	
1.01	2018-07-03	Vivante SW	Updated Table 1.
		as of v6.3.1	
		release.	
1.00	2018-03-14	Vivante SW	Initial
		as of v6.3.1	
		release.
